DETAILED ACTION

Reasons for Allowance

1. Claims 13-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the device claimed by applicant. In particular, the prior art fails to disclose or suggest a cannula with a body and ferrule with a protection cap as claimed by applicant with a female luer lock connector at one end of the body and the body comprising teeth that cooperate with complementary teeth formed in the cap, wherein the teeth are configured such that a rotational force in one direction provides torque to disengage the luer lock, and rotational force in a second direction provides torque in a second direction such that the cap disengages from the body in an **axial** direction, along with the other steps and limitations of the claims.

The best prior art of record, US 5,360,404 to Novacek, discloses a cannula 18 with a body 22, tubular ferrule 21, and a cap 20. The body 22 comprises a luer connector and lateral teeth that complement teeth found in cap 20. The teeth in Novacek provide torque when rotated in both directions, but are not configured to allow torque in either direction to result in an **axial** displacement of cap 20. Axial displacement of the cap disclosed by Novacek requires the application of axial force, not rotational force, as claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
